

## ***AET AUXILLARY PRODUCTS***

### **AET SWEETUB**

*Full Time, Full Circle Nutrition For All Horses*

A 12% all-natural protein, and low moisture tub designed for free choice feeding to all classes of horses. SweetTub's proper balance of protein and energy help improve utilization of existing hay and grain programs. Essential vitamins and trace minerals aid all horses in maintaining body condition as well as improving condition of skin and hooves.

Horses will typically consume 1/4th to 3 pounds per head daily, dependent on other feedstuffs available.

- Self Fed Free Choice Feeding • Low Moisture •
- For All Classes of Horses • Reusable Tub •

### **AET MINERAL**

*For Mixing, Top Dressing or Feeding Free-Choice*

A convenient, palatable form of essential chelated or organic trace minerals with a 1:1 Calcium to Phosphorus ratio. Designed for high performance horses or pleasure horses on a work schedule that demand highly available and readily absorbed minerals. High levels of vitamins make this the perfect mineral for hard working horses, pregnant, lactating mares and foals.

AET Mineral is for the horse owner that demands the highest plain of nutrition. This mineral can be fed free choice, blended into the grain mix or top-dressed at the rate of one to four ounces daily.

- Chelated Minerals • 1:1 Cal/Phos Ratio •
- Vitamin E • B Vitamins •

## Advanced Equine Technology

*AET, or Advanced Equine Technology, explains why U.S. horse feeds are the finest choice for Midwest horse owners.*

*Whether you ride in the ring or on the trail, the ranch or the track, your U.S. Feeds Dealer will consistently provide your horses fresh product and sound nutrition.*

### AET NUTRITION

Formulated on scientific and performance based research for all horse conditions, ages and levels of activity.

### AET INGREDIENTS

Fresh, local, natural ingredients preserve nutrients and assure palatability.

### AET MANUFACTURING

Professional milling and guaranteed nutrient analysis mean consistent, high quality pellets and textures.

AET horse feeds are generally fed at a daily rate of 1/2 to 1% of body weight, according to body condition and activity. See feed tags for specific recommendations. Feed quality hay at a minimum rate of 1% body weight. Keep clean, fresh water available at all times.

Our AET team is confident you will be happy with any of the ten AET products that are described on the following pages and available from your U.S. Feeds Dealer.

*Naturally The Best!*

## AET SENIOR FORMULA

*Pelleted Nutrition for Easy Digestion*

A highly digestible, 14% protein pelleted feed specifically formulated for the mature horse. Beet pulp, cane molasses, steam flaked corn and pulverized oats assure palatability. The proper blend of protein, energy and minerals is complimented with added vitamins, yeast and chelated trace minerals.

- Highly Digestible • Palatable Beet Pulp •

## AET COLT FORMULA

*Highly Palatable, High Protein Pellets*

A specialized, 16% crude protein pellet that provides complete nutrition for the growing colt. AET Colt Formula is specifically formulated with high levels of protein, energy, vitamins and organic trace minerals. Natural and highly digestible protein sources aim specifically at the demands of the growing foal.

Protein, energy, essential vitamins and trace minerals maximize skeletal and muscular development without excessive weight gain.

- 16% Protein Pellet • Excellent Palatability •

## AET TRANSITION FORMULA

*Pelleted Diet for the Mare, Stud and Yearling*

A 14% crude protein pellet providing complete nutrition for the pregnant or lactating mare, active stallion and developing yearling. Specifically formulated to meet the demands associated with mares during late gestation and lactation. Protein and energy levels coupled with readily available vitamins and trace minerals address critical fetal development in final gestation and promote a strong lactation.

The all-natural, high plain of nutrition is also ideal for the active stallion and provides an excellent transition diet for yearlings following AET Colt Formula.

- 14% Protein Pellet • High Plain of Nutrition •

## AET WINNING EDGE

*Pelleted diet for all classes of horses from growing foals to breeding stallions*

A 14% crude protein, pelleted feed for all classes of horses. Whether you have growing foals, pleasure horses, high performing horses or brood mares & stallions, this feed is formulated to meet all of their needs. Winning Edge has elevated levels of fat, flax seed & linseed meal to provide the safe energy your horse needs as well as enhancing skin and hair coat. Carefully balanced nutrients such as Copper & Zinc, Vitamin E & Selenium, and Calcium & Phosphorus work as a team for maximum feed efficiency and absorption.

The addition of yeast culture is important to palatability and gut health while adding a good source of selenium. The inclusion of yucca extract controls ammonia release from manure that results in a fresher, more pleasant stable.

- Pelleted • 14% Protein • 6% Fat •
- Organic Selenium • Yeast Culture •
- Folic Acid • Yucca Extract •

### GUARANTEED ANALYSIS

Crude Protein, minimum	14.00%	Salt, maximum	1.10%
Crude Fat, minimum	6.00%	Vitamin A, minimum	3,400 IU/lb
Crude Fiber, maximum	13.00%	Vitamin D3, minimum	660 IU/lb
Acid Det Fiber, maximum	17.00%	Vitamin E, minimum	45 IU/lb
Calcium, minimum	1.40%	Copper, minimum	15 ppm
Calcium, maximum	1.90%	Manganese, minimum	65 ppm
Phosphorus, minimum	0.50%	Zinc, minimum	105 ppm
Salt, minimum	0.60%	Selenium, minimum	0.35 ppm

## AET STABLE MIX

*Texturized Feed For Every Horse in the Stable*

A 12% crude protein, texturized feed for the growing and mature pleasure horse at light activity. A careful blend of professional grade molasses, steam flaked corn and heavy-test racehorse oats insure palatability second to none. Stable Mix is specifically formulated with proper levels of protein, energy, vitamins and minerals to promote health, appearance, soundness and longevity.

The addition of yeast culture is important to palatability and gut health while adding a good source of selenium. The inclusion of yucca extract controls ammonia release from manure that results in a fresher, more pleasant stable.

- Texturized • Professional Grade Molasses •
- Steam Flaked Corn • Yeast Culture •
- Heavy-Test Racehorse Oats • Yucca Extract •

## AET BALANCER

*The All-Natural Mixer For Your Grains*

A pelleted, 32% crude protein supplement for horse owners who blend their own grain mix rations. It features all natural ingredients, organic trace minerals and very high levels of Vitamins A, D and E.

Mixed with your high quality oats and corn, AET Balancer assures a highly palatable feed with all the essential nutrients for optimum performance and sound health. The inclusion of yucca extract controls ammonia release from manure that results in a fresher, more pleasant stable.

- 32% Protein • Organic Trace Minerals •
- Yucca Extract • High Levels of Vitamins •

### TYPICAL 12% GRAIN MIX

1200 lbs. Oats  
500 lbs. Cracked Corn  
250 lbs. AET Balancer  
50 lbs. Cane Molasses

# AET CLASSIC FORMULA

*The Perfect Pellet For All Midwest Horses*

A pelleted, 12% crude protein feed primarily designed for the growing and mature pleasure horse. Its palatability and versatility give it a wide range of applications for the avid horse owner. Classic Formula is carefully formulated to include proper levels of protein, energy, vitamins and minerals necessary for the most active horses.

Vitamins and organic trace minerals are maintained at exact levels for proper assimilation of nutrients, metabolism and immune function. The addition of yeast cultures and ground whole oats are important to palatability, gut health and hindgut fermentation while adding a good source of selenium. Yucca extract helps lower ammonia release from manure resulting in a fresher stable.

- 12% Protein Pellet •
- Whole Oats • Yeast Cultures •
- Yucca Extract • For All Horses •

# AET PERFORMANCE MIX

*Texturized Nutrition For High Performing Horses*

A specialized, 12% crude protein feed formulated to meet the extreme demands of horses working at intense levels of activity. This feed is texturized for maximum acceptance. A careful blend of professional grade molasses, steam flaked corn and heavy-test racehorse oats are an important part of this highly digestible diet. Added vitamins and organic trace minerals increase mineral availability resulting in better hoof, bone and joint integrity.

Yucca extract controls ammonia release from manure that results in a fresher more pleasant stable. Added yeast cultures enhance phosphorus utilization and hence bone strength, aids palatability, provides extra selenium and helps maintain gut health, all which are critical for performance horses.

Fat supplies energy without the risk of digestive upsets that can often accompany high starch diets. Omega 3 fatty acids help hair coat, reproductive function, tissue repair and immune function. Yeast enhances hindgut fermentation to get the most out of fiber sources.

- Texturized • Professional Grade Molasses •
- Steam Flaked Corn • Heavy-Test Racehorse Oats •
- Yeast Culture • Yucca Extract • Chelated Trace Minerals •
- Omega 3 Fatty Acids from Vegetable Oils •
